

Web Development

Submission Date: 28th July 2022

Submission Link: <https://ncrypt.net.in/submit/webdev>

Eligibility: VI - XII

Maximum members per team: 2

Theme

You are a freelancer and hired by a Big-Tech Company at the position of Lead Website Developer.

You are required to recreate at least 3 pages of their existing website that gives the website a new look.

Deliverables

1. Website: Create a website based on the prompt and make sure to deploy it. You can deploy it on [Github](#), [Netlify](#) etc. You can also build a web app or extension/plugin to the website, if you want.
2. Document: Write an outline of your idea. It can be informal and just a little bit of data explaining the website. Also mention which company's website you are recreating.
3. Source Code: Send the source code of the website of the website with the document. The code can be uploaded on [Google Drive](#), [Github](#) etc.
4. Bibliography. Include libraries and external sources.

Guidelines

For the event, you are required to send all the deliverables through the given link above by 28th July, 11:59PM.

You may use libraries like Bootstrap but not any like Tailwind CSS that gives you pre-built modules. Usage of backend has bonus points.

Plagiarism of code in any format would lead to disqualification of the participant. YouTube videos are also included. You can take reference from them but not the whole code.

Judging Criteria

- Originality
- Efficiency
- Overall Implementation
- Layout
- Designing of the website
- Responsiveness (Bonus Points, not mandatory)
- Color Scheme
- Typography
- Presentation
- Visual/Aesthetic Appeal
- Usability
